

CORTLAND CAMPUS AND CITY MAP

On the map, you see two circles. The radius of each circle is 1/2 Mile. Located at the center of the bottom circle are 49 Owego Street and 49 South Avenue. Located at the center of the top circle is the base of Clayton Avenue.

By comparing the areas of the two circles, it is easy to see that the bottom circle (*Owego Street and South Avenue*) encompasses 100% of the campus, while the top circle (*Clayton Avenue*) covers only 50% of the campus.

What does this mean to you? Owego Street and South Avenue are *closer to more of the campus than is Clayton Avenue.*
